

2024 - 2025 CATFISH

African sharptooth catfish are a source of high-quality proteins and omega-3 fatty acids. These qualities make the catfish extremely nutritious and tasty – perfect for a rapidly expanding global population.

Sinking feed

Floating feed

Semi-floating feed

Free from land animal protein

High digestibility

Omega-3 fatty acids

Designed for RAS

Sustainability score

With astaxanthine

Low nitrogen and phosphorus emission

Improved resistance

CATFISH

AQUATE™

Innovative premix in all **Alltech Coppens'** feeds.

- + Optimizes growth
- + Supports immune response
- + Optimizes digestive function
- + Contributes to mucous barrier protection
- + Contributes to external barrier protection

BIO-MOS®

is a mannan-oligosaccharide, which is known to bind and drain opportunistic bacteria. This can result in a significant improvement of the intestinal flora. Additionally, it can improve the structure and length of the microvilli in the gut through which the nutrient intake can increase. **BIO-MOS®** contributes to mucous barrier protection.

BIO-MOS®

Improves intestinal function

BIOPLEX®

is a crucial element in our new premix. **BIOPLEX®** are organically bound trace elements such as zinc, copper, manganese & iron. With **BIOPLEX®** we can improve the health, growth & performance of the fish.

BIOPLEX®

Improves performance

Break with tradition and feed your animals the modern way.

Alltech has proven that chelated trace minerals in the form of Bioplex® and Sel-Plex® can be included at significantly lower levels while improving animal performance. This optimizes animal mineral requirements and reduces negative environmental impacts. We call this innovation Alltech's Total Replacement Technology™ (TRT).

TOTAL REPLACEMENT TECHNOLOGY®

ACTIGEN®

is derived from yeast cell walls and supports the fish's immune response. **Actigen®** furthermore optimizes growth in fish.

ACTIGEN®

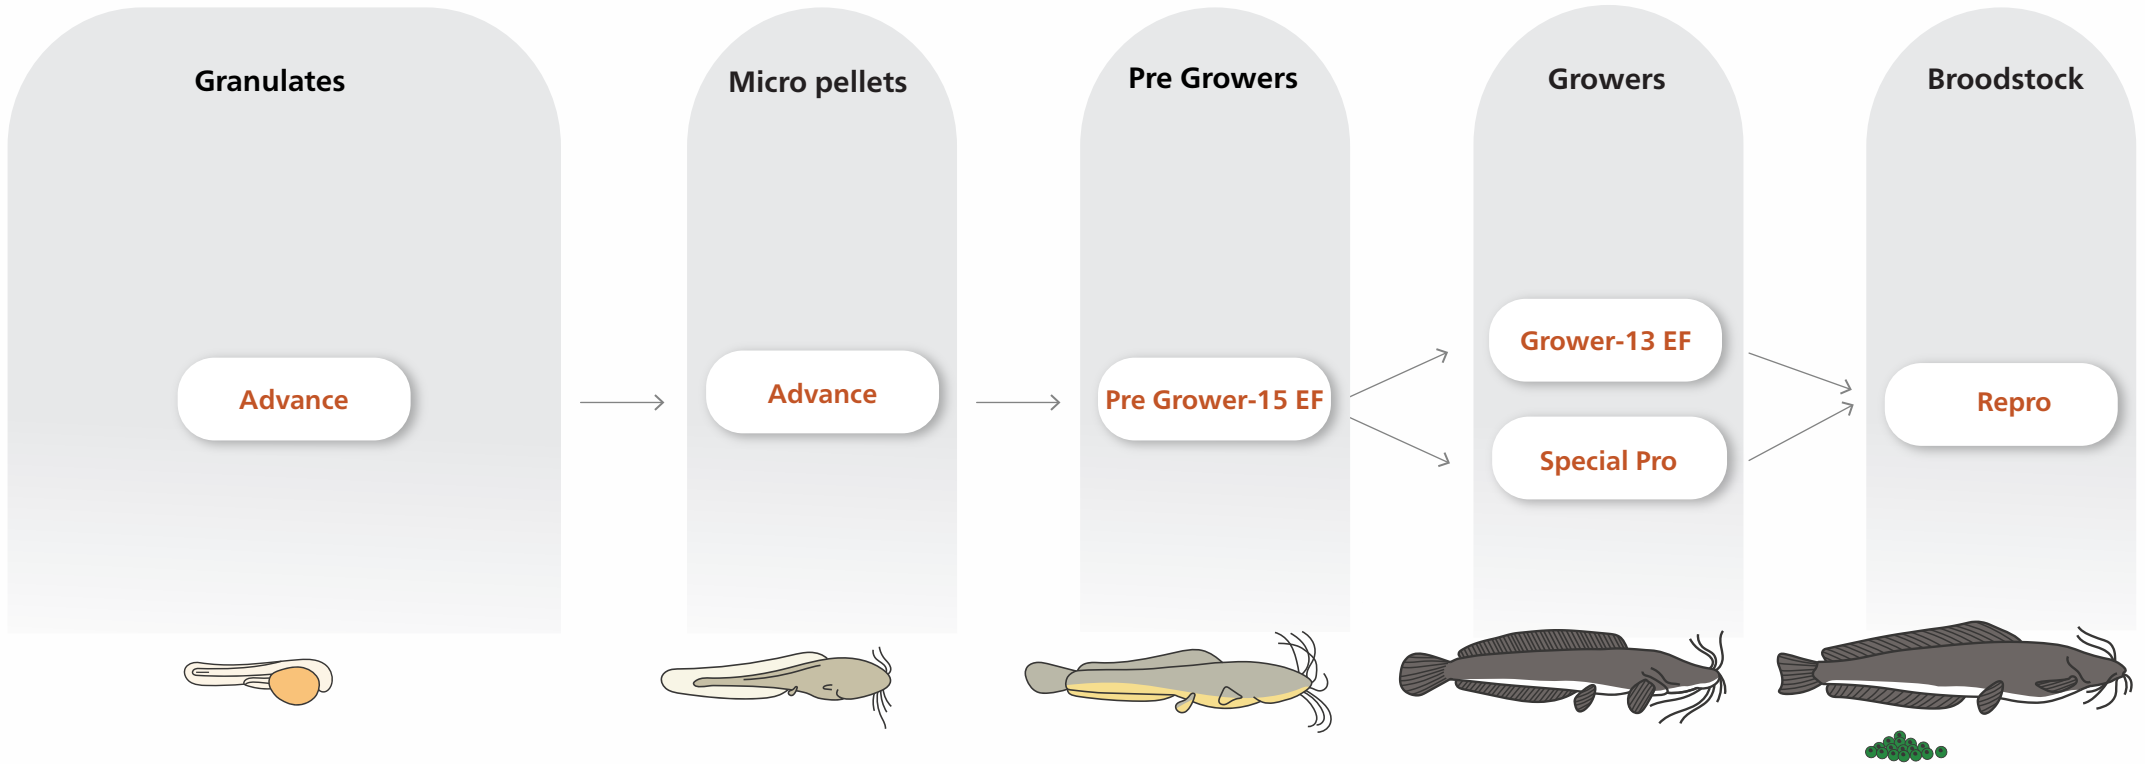

Helps maintain the immune system

178	2000	0.84	4.5 / 6.0

* This feeding protocol is only a guideline.

Feeding protocol for African catfish fry:

 The fry are fed to near satiation ($\geq 5,5$ %BM/day)

This feeding advice is a guideline only based on optimal water quality and a water temperature of 27-28 °C

Feeding days	Average weight (g)	Feed size	Feed type
1	0.0025	Live feed	Artemia
2	0.005	Live feed	Artemia

* The actual feed rate must be based on the appetite of the fry.

* The fry should ideally be fed 6 times per day e.g. 8.00 hr, 11.00 hr, 14.00 hr, 17.00 hr, 20.00 hr, 23.00 hr.

- For semi-intensive farming
- High performance
- High survival
- Medium energy starter diet
