

- Low energy level for perfect body shape
- With spirulina
- Can be fed all year round
- Flavoured with insect meal

### COMPOSITION:

| Analyses (%) |     | Sizes  |
|--------------|-----|--------|
| Protein      | 32  | 3.0 mm |
| Fat          | 5   | 6.0 mm |
| Crude fibre  | 3,0 |        |
| Ash          | 9,6 |        |

### Vitamins added

|                   |       |
|-------------------|-------|
| Vitamin A (IE/kg) | 11999 |
|-------------------|-------|

### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

Staple is a complete floating diet for koi. Highly digestible ingredients make Staple a perfect diet for daily use. The nutritional balance keeps your koi in good condition. Because it is a water-stable floating feed, you can easily observe your fish's eating behaviour and minimise water pollution.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.

The values of the nutrients and vitamins are from the time of writing.

These values can vary due to natural variation in the ingredients. We reserve the right to change our recipe.

For the exact values we refer to the label.

- High protein level for growth
- Correct protein and energy level to retain good shape
- Rich in essential amino acids
- Highly palatable
- Flavoured with insect meal

### COMPOSITION:

#### Analyses (%)

|             |      | Sizes  |

### PERFECT FOR FEEDING ALL KOI:

#### APPLICATION:

Grower is a complete floating grower feed with a higher protein level to promote growth. The right protein/energy (P/E) ratio not only gives good growth and muscle development but also helps maintain the right shape. You can use Grower to grow show koi to large sizes.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.

- Ideal in cooler water due to a high wheat germ level
- Highly digestible
- Includes a prebiotic fibre
- Supports a high vitality
- Flavoured with insect meal

|-------------------|-------|
| Vitamin A (IE/kg) | 12001 |
|-------------------|-------|

### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

Wheat Germ is a premium condition feed to keep your koi in good condition throughout the year. Thanks to the high level of wheat germ, this diet is rich in vitamin E, essential fatty acids and minerals and is highly digestible. Especially when the water temperatures drop (below 15 °C), many koi keepers choose Wheat Germ as this diet performs well also under these conditions. Furthermore, Wheat Germ does not contain any carotenoids, so it is ideal for koi that should not receive any pigments at all for an optimal contrasting colouration.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.

| Vitamin A (IE/kg)   | 12000 |        |

### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

Orange is a premium grower for koi, with carotenoids for colour intensification. This diet contains krill meal to make it extra attractive to koi and promotes a good feed intake.

It also contains a prebiotic and BIO-MOS<sup>®</sup>. The prebiotic serves as a food source for the positive microflora in the gut. BIO-MOS<sup>®</sup> binds opportunistic bacteria and optimises digestive function. This supports a good intestinal balance.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.  
Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.

### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

For deep and especially intense colours in koi, you can use our Spirulina diet. This carotenoid-rich feed can be used in preparation for shows and contests. Because the white parts may discolour slightly, it is advised to switch to Wheat Germ in the last month to make the white pure white again.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.  
Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.

### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

Top Koi is our number 1 professional feed for koi. The protein/fat ratio is balanced to maximize the growth of your koi and simultaneously keep them in perfect shape. We included BIO-MOS<sup>®</sup> to keep your koi in excellent health and top condition. This is especially important for show koi as they age. Furthermore, it contains astaxanthin and spirulina to support the colours of your koi. Top Koi is also fortified with a prebiotic.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.
