PERFECT FOR FEEDING ALL KOI:

APPLICATION:

Health is a high-quality, health-supporting feed for koi, based on highly digestible and palatable ingredients like wheat germ.

Koi can benefit from our Health diet in times of stress, adverse conditions and when a boost of the condition is needed. Because Health is pigment-free and low in energy, it can be used after periods of intensive carotenoid feeding to prepare for contests with show koi to reach optimal colouration. White turns into pure white again. Feeding advice from 10 °C.

* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.
