### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

Midori is a complete floating and insect meal containing feed with a high protein level to promote growth. Furthermore, it contains astaxanthin to support the rich colours in your koi.

The Midori pellet has been produced in 3 different larvae shapes, which stimulate the natural feeding pattern of the koi.

Feeding advice from 15 °C.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.
