### PERFECT FOR FEEDING ALL KOI:

### APPLICATION:

For deep and especially intense colours in koi, you can use our Spirulina diet. This carotenoid-rich feed can be used in preparation for shows and contests. Because the white parts may discolour slightly, it is advised to switch to Wheat Germ in the last month to make the white pure white again.

\* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes.

Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.
